DAILY GAZETTE.

New York Dry Goods Market.

COTTON AND COTTON FABRICS.-Great advance in prices. For a week past the cotton market has been in a feverish state of excitement. The price has advanced to Freight Train, 311 cents, and the tendency is still upward. The quantity on the market for sale is reduced to less than 10,000 bales, which is to-tally inadequate to the wants of the mills for the next six months. In this condition of things it is difficult to see what is to stop the advance. Many sound and judicious parties are strongly of the opinion that it will not stop much short of the price of

wool, which is now standing at 48c to 50c. It is argued that if the war should cease and free access be obtained to all the cotton ports within a month, that still the market would be sustained, for the reason that Milwankee, Montoe, the cotton is in no shape for shipment and Madison, could not be got ready for a month or two.

Furthermore, that a powerful demand from Milwankee,

Europe, as well as our own country, would Milwankee,

Prairie du Chien,
Milwankee, spring up; and that the demand for goods from the south, together with the demand from the north, consequent upon the restoration of peace, would sweep the market of all manufactured cotton goods now on hand, and all that could possibly be got into the market during the next three months. But the prevalent opinion is that the war will not cease at present, and that the demand for goods will continue to increase. The country is believed to be bare of goods, and the disbursement of the government have been and will continue to be so large that business throughout the whole country is

was likely to destroy all material prosper-Cotton goods, in sympathy with the raw material, have rapidly advanced. In addition to the advance in the raw material there is the fact that no cotton goods of any consequence are now being made, and the market is getting rapidly cleared out of the old stock. Two-thirds of the mills are said to have no cotton, or running on army goods, and if that were not so, it is claimed that at the present price of cotton it would

be impossible to produce goods at anything like the prices at which they are being sold. Printing cloths have advanced to 83 and 9 cents, and it is confidently asserted that they must and will go up to 10 cents,-Prints that a month ago were sold at 3 cents are now held at 12 cents. The Merrimack print, which is the standard, is now selling at 12½ cents, Sprague 12 cents, American 112 cents, Phillip Allens 11 cents, Union 102 cents, and all others in proportion. Oxford Denims are firm at 134c, Kentucky Jeans, that were sold in September at 124 to 14c, are now held at 20 cents, and no anxiety is exhibited to sell even at that, the holders declaring that they are sure of getting 25c, and expect to get 30c. In the natural course of trade the manufacturers will not long con tinue to sell a staple article of general use for less than it can be produced .- N. Y. World, 12th.

> NARRATIVE OF THE ESCAPE OF A FADE-RAL OFFICER FROM RICHMOND,—Col. De-Villiers, of the 11th Ohio regiment, recently escaped from Richmond, and on Wednesday evening last told his story before a large audience in Cincinnati. He was captured by the confederates at the skirmish of Scarey Creek, in western Virginia, and was immediately sent to Richmond and put in jail. Jail life not agreeing with his constitution, he made various offorts to escape, and finally succeeded. Here is the narra-

"He stole the coat and hat of a secession officer, and in that garb passed the guard. About six miles from Richmond he was encountered by a guard, and to his challenge he replied, 'A friend without the countersign.' (He had taken the precaution to lay down the double barreled shotgun which he contrived to get before he cscaped from Richmond, before he approached this guard. He had, besides, a revolver and a bowie knife.) Approaching, they asked him where he was from and whither he was going. He replied from Richmond to Petersburg. They then asked him why he did not take the railroad, and he said he missed the cars. They then took him in custody, and marched, one each side of him, upon a narrow bridge crossing a stream near at hand. The situation was desperate; but he was determined never to go back to Rickmond alive; so when we got to about the middle of the bridge he struck to the right and left, knocking one of the guard on one side and the other on the other, and giving them both a good swim! Hence he made his way towards Petersburg, subsisting for three days upon nothing but a few raw beans.

"Upon this tramp, for a distance of sixty-five miles, he carried his skiff for crossing rivers (a pine board) upon his shoulders. During his travels he was several times shot at. When he got in the neighborhood of Magrader's forces, his hardest time began. He tried to pass sentinels several times, and at one time was twice shot at in quick succession. He shot too. He did not know whether he hit the two sentinels or not, but they never answered. But the whole brigade was aroused, and he took to the James river in what he called his skiff, namely, his pine board companion. He landed on the other side in a swamp, re-crossing again near Jamestown, when he lost his gun. He had cast away his officer's coat, and it may well be imagined that what remained of his suit was by this time rusty enough. So he took an open course and resolved to ask for work. He hired with a German blacksmith at a dollar and a half a week, having concluded to remain awhile and learn something of the condition of the rebel forces. He staid a fortnight, observing all the rebel movements. At the expiration of this time he got tired of blacksmithing and wanted to go home. He found a good German Union man, to whom he told his story without reservation, just as he was telling it here to-night. This was of great service to him; he led him for nine days, the colonel having adopted another Yankee trick, and SCALES made a blind man of himself; he couldn't ee, and the German was his guide. Dropping the Yankee French, he became a French subject, and wanted to go back to France, because he could not get any work to do here; and so he told Gen. Huger when he got into his command. The general promised to send him to Fortress Mon-

STANDARD MACHINES.

Well known to be the best for Manufacturing Purposes:

No. I, Standard Shuttle Machine, formerly sold at \$90,

Reduced to \$70.

No. 2, Standard Shuttle Machine, formerly sold at \$100,

Reduced to \$75.

Singer's Letter A Machine, I 8 the best Machine in the word for Family Sawing and Light Manufacturing purposes; Price, (with Hemmer,) and beautifully ornamented,

FIFTY DOLLARS. The Nos 1 and 2 machines are of great capacity and application for manufacturing purposes.

Our No 3 muchines are especially adapted to all

kinds of light and heavy

LEATHER WORK,

in Carriago Trimming, Boot and Shoo Making, Harness Making, etc., etc. They are of extra size, with an ann long enough to take under it and stitch the large est sized dashes. There is scarcely any part of a Trin mers' stitching that cannot be better done with the than by hand; so, too, the saving of time and labor is very great. The table under these machines is 24 inch-es long, and the shuttle will held six times the usual quantity of thread. The large machines work as fas would ask for our Letter A machines, the special attention of Vest Makers and Dress Makers, and all those who want machines for Light Manufacturing pur-poses. They embody the principles of the standard machines, making like them, the interlock stitch, and are destined to be as celebrated for Family Sewing

and light manufacturing purposes as our standard ma chines are for mountacturing purposes in general. We have always on hand Hemming Guages, Silk Twist, Linea and Cotton Thread on Spools, Best

Machine Oil in Bottles, etc., etc.

We manufacture our own Needles, and would warm all persons using our machines not to buy any others. We know that there are needles sold of the most inferior quality, at higher prices than we charge for the best. The needles sold by us are manufactured especially for our machines. A bad needle may render the best machine almost melest.

Our customers may rest assured that all our Branch

Offices are furnished with the

GENUINE ARTICLE. In case of small purchases, the money may be sent in postage starnes or bank notes.

Correspondents will please write their names distinctly. It is all important that we should in each case know the post office, county and state,

MED. All persons requiring information about Sewing
Machines, their size, prices, working capacities, and the
best methods of purchasing, can obtain it by sending
to us, or any of our Branch Offices for a copy of

J. M. SINGER & CO.'S GAZETTE. which is a beautifully illustrated Pictorial Paper.

We have n ade the above Reduction in Prices with the two fold view of benefitting the public and ourselves.

The public have been swindled by spurious machines made in imitation of ours. The metal in them, from the fron casting to the smallest piece, is of poor quality. Their makers have not the means to do their work well. They are hid away in secret places, where it would be impossible to have at their command the proper mechanical appliances. It is only by doing a great busichanical appliances. It is only by doing a great business, and having extensive manufacturing establishments, that good machines can be made at moderate prices. The best designed machines, Badly Made, are always hable to get out of order, and are sure to cost considerable trouble and money to keep them in repair. The qualities to be looked for in a machine are: certainty of correct action at all rates of speed, amplicity of construction, great durability and rapidity of operation, with the least labor. Machines to combine these resential and first land for the least and first land for the least and first. pool:
1st Class, according to State Room,
1st Class, according to The perclasers of machines, whose daily bread it may concern, will find that those having the above qualities not only work well at rapid as well as slow rates of speed, but last long in the finest possible working order. Our machines, as made by us, will carn more money with less labor than any others, whether in imitation of ours or not. In fact, they are chesper than any other machine as a gift.

COTTON AND COTTON FABRICS.—Great advance in prices. For a week past the cotton market has been in a feverish state of excitement. The price has advanced to 31½ cents, and the tendency is still upward. The quantity on the market for sale in reduced to less than 10,000 bales, which is to the will be added to the control of the tally inadequate to the wants of the mills for the next six months. In this condition of things it is difficult to see what is to stop the advance. Many sound and judicious parties are strongly of the opinion that it will not stop much short of the price of wool, which is now standing at 48c to 50c. It is argued that if the war should cease and free access be obtained to all the cotton ports within a month, that still the market would be sustained, for the reason that the cotton is in no shape for shipment and could not be got ready for a month or two. Furthermore, that a powerful demand from Europe, as well as our own country, would spring up; and that the demand for goods from the south, together with the demand from the north, consequent upon the restoration of peace, would sweep the market of all manufactured cotton goods now on hand, and all that could possibly be got into the and all that could possibly be got into the market during the next three months. But Night Express Leaves the prevalent opinion is that the war will not cease at present, and that the demand for goods will continue to increase. The country is believed to be bare of goods, and the disbursement of the government have been and will continue to be so large that business throughout the whole country is gradually improving. People have gradu-ally become relieved from the apprehensions that existed ninety days since, that the war was likely to destroy all material prosper-Cotton goods, in sympathy with the raw

material, have rapidly advanced. In addition to the advance in the raw material there is the fact that no cotton goods of any consequence are now being made, and the market is getting rapidly cleared out of the old stock. Two-thirds of the mills are said to have no cotton, or running on army goods, and if that were not so, it is claimed that at the present price of cotton it would be impossible to produce goods at anything like the prices at which they are being sold.

Printing cloths have advanced to 82 and 9 cents, and it is confidently asserted that they must and will go up to 10 cents .-

Prints that a month ago were sold at 9 cents are now held at 12 cents. The Merrimack print, which is the standard, is now selling print, which is the standard, is now selling at 12½ cents, Sprague 12 cents, American 11½ cents, Phillip Alicus 11 cents, Union 10½ cents, and all others in proportion. Oxford Denims are firm at 13½c, Kentucky Jeans, that were sold in September at 12; to 14c, are now held at 20 cents, and no anxiety is exhibited to sell even at that, the holders declaring that they are sure of getting 25c, and expect to get 30c. Standard brands of heavy sheetings, such as Law-rence C. Stark, Appletons, Indian Head, etc., are held at loc, and still tending upward. At the present price of cotton we are assured by reliable authority that such a sheeting as the Starkmills cannot be made for less than 16c. In the natural course of trade the manufacturers will not long continue to sell a staple article of general use for less than it can be produced.—N. 1. World, 12th.

NARRATIVE OF THE ESCAPE OF A FEDE-BAL OFFICER FROM RICHMOND.—Col. De-Villiers, of the 11th Ohio regiment, recently escaped from Richmond, and on Wednesday evening last told his story before a large audience in Cincinnati. He was captured by the confederates at the skirmish of Scarey Creek, in western Virginia, and was immediately sent to Richmond and put in jail. Jail life not agreeing with his consti-tution, he made various efforts to escape, and finally succeeded. Here is the narra-

tive:
"He stole the coat and hat of a secession officer, and in that garb passed the guard. About six miles from Richmond he was encountered by a guard, and to his challenge he replied, 'A friend without the countersign.' (He had taken the precantion to lay down the double barreled shotgun which he contrived to get before he escaped from Richmond, before he approached this guard. He had, besides, a revolver and a bowie knife.) Approaching, they asked him where he was from and whither he was going. He replied from Richmond to Petersburg. They then asked him why he did not take the railroad, and he said he missed the cars. They then took him in custody, and marched, one each side of him, upon a narrow bridge crossing a stream near at hand. The situation was desperate; but he was determined never to go back to Rickmond alive; so when we got to about the middle of the bridge he struck to the right and left, knocking one of the guard on one side and the other on the other, and giving them both a good swim! Hence he made his way towards Petersburg, subsisting for three days upon nothing but a few

raw beans. "Upon this tramp, for a distance of sixty-five miles, he carried his skiff for crossing rivers (a pine board) upon his shoulders. During his travels he was several times shot at. When he got in the neighborhood of Magrader's forces, his hardest time began. He tried to pass sentinels several times, and at one time was twice shot at in quick succession. He shot too. He did not know whether he hit the two sentinels or not, but they never answered. But the whole brigade was aroused, and he took to the James river in what he called his skiff, namely, his pine board compan-ion. He landed on the other side in a swamp, re-crossing again near Jamestown, when he lost his gun. He had cast away his officer's coat, and it may well be imagined that what remained of his suit was by this time rusty enough. So he took an open course and resolved to ask for work. He hired with a German blacksmith at a dollar and a half a week, having concluded to remain awhile and learn something of the condition of the rebel forces. He staid a fortnight, observing all the rebel move-ments. At the expiration of this time he got tired of blacksmithing and wanted to go home. He found a good German Union man, to whom he told his story without reservation, just as he was telling it here to-night. This was of great service to him; he led him for nine days, the colonel having adopted another Yankee trick, and made a blind man of himself; he couldn't see, and the German was his guide. Dropping the Yankee French, he became a French subject, and wanted to go back to France, because he could not get any work to do here; and so he told Gen. Huger when he got into his command. The general promised to send him to Fortress Monroe with a flag of truce. The next flag of

truce that was sent he accompanied, blind A VER still, and led by his faithful German friend," found at truce that was sent he accompanied, blind

There is searcely any part of a Trimmers' stitching that cannot be better done with them than by hand: so, too, the saving of time and labor is very great. The table under these machines is 23 inchest long, and the shuttle will held six times the usual quantity of thread. The large machines work as fast as small ones.

We would ask for our Letter A machines, the spectal attention of Vest Makers and Dress Makers, and all those who want machines for Light Manufacturing purposes. They embody the principles of the standard machines, making like them, the interlock stitch, and are destined to be as celebrated for Family Sewing and light manufacturing purposes as our standard machines are for manufacturing purposes in general.

We have made the above Reduction in Prices with the two fold view of benefitting the public and ourselves. The public have been swindled by spurious machines made in imitation of ours. The metal in them, from the iron casting to the smallest piace, ind poor quality. Their makers have not the means to do their work well. They are hid away in servet places, where it would be impossible to have at their command the proper mechanical appliances. It is only by doing a great business, and having extensive manufacturing establishments, that good machines can be made at moderate prices. The best designed machines, Badly Made, are always highle to get out of order, and are sure to cost considerable trouble and money to keep them in repair. The qualities to be locked for in a machine are; certainty of correct action of all rates of speed, simplicity of construction, great durability and rapidity of operation, with the least labor. Machines to combine these casential qualities, must be made of the best metal and fanished to perfect on. We have the ways and means, on a grand scale, to do this.

The purchasers of machines, whose daily bread it may concern, will find that those having the above qualities not only work well at rapid as well as slow rates of speed, but last long in the finest possible working order. Our machines, as made by us, will carry more money with less labor than any others, whether in imitation of ours or not. In fact, they are cheaper than any other machine as a gift.

Another General to be Medified.

Gen. Phelps, who recen'ly landed at Ship Island, about seventy five miles south east of New Orleans, with aportion of Butler's expedition, has been doing something "irregular" which has disadfully scared the rebels of that region, and at the same time frightened the doughfaces at Washington. He has thrown a shell or two into both camps. A battle was reported at Columbus, three or four days ago, to be going on at New Orleans, and there was a loud call for help. Several regiments and three gunboats were despatched from Columbus with all speed. Who is pitching into the robels at New Orleans, we do not know-we can only conjecture that it is Gen. Phelps. We learn from Washington that he has been issning a proclamation, which all the politicians at the federal capital repudiate, on account of its anti-slavery sentiments .-The Washington gentlemen have already to Bersheba, (that's scripture ain't it?) and hastened to make their record clear by it has required a large amount of labor and place to day, by Gen. Van Reusselser, atthrowing the responsibility upon General time to get it together and increase it to its tended by Gens. Sturges, Sweency, Grant Phelps. On that account we think there must be something vigorous and sensible about it, and we feel inclined to approve of cess of our first expedition down the coast. and at Fort Holt 3,000. Gen. Van Renssehis proclamation without seeing it. Any- Suppose two or three more should be sent laer goes to Paducah to-morrow, and to thing that will stir up indignation and alarm at both points must be good.

that a general possessing the right kind of in Virginia do you suppose could be kept | day night, without discovering any enemy. grit, would get loose from government red | there? Suppose then, after perhaps one tape and make an active campaign on his own account, before he could be "modified." Gen. Phelps has chosen the right point for such a demonstration. He is so far away from headquarters that he may be simply to start and clean everything before able, by a few Napoleonic movements, to it; and clean it, too, in such a manner that conquer a peace in Louisiana before orders it would stay cleaned-not as it was done can reach him not to "hurt our friends" in Missouri, driven out of the state and as down there. If he has commenced such a soon as your back is turned, have the rebcampaign, we shall soon see the difference els flocking back, thick as ever. It would between his work and the "boy's play" at | be the same here, if we should now advance | Port Royal. We hope he has invited the and drive them before us. Our march slaves to come in and help him fight for would, of necessity, be very slow, for there "liberty and union." He needs their aid, are other things to be done in a large as he has not men enough, and if they are larmy besides having the men get up and willing to assist in crushing the rebellion, march off. they ought to have their freedom.

A proclamation, modeled after the one issued by Gen. Jackson at the same place in 1815, would be sufficient to bring the whole slave population to his banner. They would be under military law, and could thus be restrained from acts of cruelty, while they would be invaluable as auxiliaries in building forts, throwing up embankments for the protection of the troops, as teamsters and guides. A general who would refuse their services would be guilty of a crime in neglecting to use the best means at hand to suppress the rebellion and to save the lives of his men. Such a movement as this, coupled with a notice that if the rebels refused to lay down their arms within a certain time, the slaves would be directed to dig out the levee of the Mississippi and drown the whole race of rebels in Louisians, would bring them to terms. Why should we hesitate to use all the means within our reach to end this infernal war? More lives are lost by mild measures than by unsparing vigor. We hope Gen. Phelps will show the country "how it can be done" in the shortest time; and if the politicians at Washington reject him, he may be sare that the people will reward him. They are praying for some MAN to lead the nation out of its troubles, and when their ideal shows himself by the right action, he will not need the certificates of cabinat officers and members of congress to commend him to the gratitude of his countrymen.

The Janesville Gazette is very much disturbed lest it shall not be accredited a full "abolition" sheet. The editor was, we believe, an unsuccessful candidate for office under Lincoln, and the consequence is, loss have observed this, that all republican P. M. editors sustain the policy of the presi dent-the unsuccessful ones lose no opportunity of giving Abraham a " piece of their mind." Charley, you are an "abolitionist." a regular "curly-haired" and entitled to all the honors as such .- Madison Patriot.

This is the kind of answer we get for republishing the "abolition howl" of the Patriot on the 26th of last April, in contrast with its present pro-slavery "howling." By the way, if the Patriot will tell us what office or official favor we have ever asked at the hands of the federal administration, it will impart some information not now possessed by any person connected with the iron foundries, one of them lately employ- the highest authority for saying that the

The Reasons for Inactivity.

The following is a portion of a private etter from Lieut. H. R. Clum, of this city, to a friend here. We publish it as giving the reasons probably prevailing in camp for the inactivity of the army:

Head Quarters First Brigade, Smtm's Division, } Camp Griffin, Va., Dec. 11th, 1861.

I was somewhat astonished on reading your letter at the impatience expressed. I have, for a long while, as has almost every one here, thought the same as you do: but as far as the inacticity of the army here is concerned, I begin to think it is the quickest and surest method that can be adopted must therefore be regarded accordingly.

New York, Dec. 18. to settle the difficulty. This probably will astonish you; but let us look at it a moment. Here is an army in front of Washington, numbering probably 100,000 or 125,000, opposed to us; a short distanceat Centreville—is another of about 75,000 strongly entrenched, with a place to fall back upon—(Manassas)—that is almost impregnable. We might, and I have no doubt we could, drive them from both places; but at what a cost, think you? Probably a quarter of our forces would be gained after we had driven them from both farther; they would not be conquered, but | brough and Geo. Weiler. simply defeated. On the other hand, suppose we should be defeated? and defeat would not be impossible, for let me tell you, it takes but a few men behind good breast- those heretofore reported. One of them is works, and in good forts, to repulse a large | nearly opposite the station of the flotilla at army. I have no doubt, that with the force we have here, we could repulse any number | hatteries heavy guns are mounted, evidentthe robels could bring against us. I suppose you would say, then why keep so many men just to guard Washington?-Well, I don't know as I can satisfactorily answer the question, but to a person here. it seems as if we had just enough men to

have when this war commenced, and where was what we did have? Scattered from Danpresent magnitude. And now let us suppose a little. First, we have seen the suc- at Cairo was 8,000; at Bird's Point 6,000, down; suppose the gun boats and army to the troops. be sent down the Mississippi; suppose We have been hoping, for some time, these all successful, how many of the troops ling from Belmont to Charleston, on Saturhalf of the rebels in Virginia had been obliged to return home to take care of the interests of each one's state, do you no see what the army here could then do? Why,

Again you complain of the slowness of

front of us, makes me think that just the thing is being done to conquer an early peace. Last Sunday a contraband came in our lines. I was put on picket and we had a good chance to I question and cross question the chap before he got to head. quarters. He says there are about 75,000 troops at Centreville. He drew a plan of the fortifications there, on which was designated the locations of the different forts. batteries and the disposition of the troops. He reported that they have no coffee or salt, but have enough fresh beef, which does not amount to much without salt, in a long run. We asked him how they were clothed --- whether they were dressed as well as our men? "That's just what I was looking at, your good clothes" said he. He also says the robel soldiers are mutinous as the devil. They call Jeff. Davis "Old a manner that shows skillful engineering on federals had only 6,000 men there, 10,000 One Eye," and curse him all sorts at times. He is now cooking for our field officers. When he looked around and saw our barrels of beef and pork, he exclaimed "goody God, do you live like this all de time." He is from New Orleans, and I think he is one of the most intelligent darkeys I ever saw, for an uneducated brat.

The condition of the enemy's troops in

The Madison Journal learns from a private letter that there has been some trouble between our 8th and 11th regiments at Camp Curtis, Missouri. Col. Murphy, of the 8th, it is stated, was appointed post commander by Gen. Curtis, but the officers of the 11th refused to recognize his authority. At the last accounts the differences had been settled and order restored.

The negroes at Fortress Monroe are now regularly employed by the government at a rate of not less than eight dollars a month, to create a fund for their own subsistence. It is stated that besides paying their own way, they have accumulated a fund of over \$3,000, under the operation of this system.

They are burning corn for fuel down in Logan county, Illinois, and corn for 7c per tomac, and render certain another general bushel is cheaper than coal at 30c. It is in great favor with the boys as it does not require to be sawed and split.

Among the buildings included in the burnt district in Charleston, are two ed in the manufacture of cannon, and the other in making cannon balls and shells.

Ex-PRESIDENT TYLER'S HOUSE .- The house of Ex-President Tyler, at Hampton, is now being used for a purpose probably never dreamed of by the proprietor. It is converted into a refuge for "fugitives from labor;" not such fugitives as the ex-Presiwith black skins, flat noses and crimped morning all over the south. A great many hair. The basement is occupied as a school room for juvenile blacks.

WASHINGTON, Dec. 18.

[Reported Exclusively for the Daily Gazette.] MORNING DESPATCHES.

Richmond and Norfolk papers of yesterlay have been received. The Centerville and Fairfax county correspondent of the Richmond Dispatch writes, Dec. 15th, that the fortifications around Centerville are completed, and now present quite a formidable appearance for field fortifications.— They are built very strong, some of the works being bastioned forts, constructed in the part of somebody, Gen. Beauregard I presume. Some care seems to have been taken with embrasures, which are built to combine convenience for handling the guns with the best method for protecting the men. They are very strongly built with hurdles and sandbags, and will stand beavy cannonading before giving way. The armaments of these forts having arrived, from a

are drilling in these batteries nearly every day, and some have become proficient marksmen. All have attained perfectly the range of any point where a hostile battery could te planted. A series of resolutions have been adopt ed by the legislature of Tennessee, relative to the opening of the southern ports, and recommending that no crop of cotton be

istration. The Examiner says: Intelligence, appa rently better founded than that which generally finds its way from Washington, has been received of an intention on the part of the military authorities of the United States. to make an advance on the lines of the Poengagement within the next ten days.

Herald's special - From the numerous dispatches that have been received here today, there is a fear expressed among the people in different parts of the country that the government may be induced by some diplomacy to give the traitors up. Times special.—A cabinet meeting was held to-day, at which the English question was discussed, of course informally. There was but one sentiment, that no quarrel with England must be permitted to interfere a moment to stay the reduction of the rebels. I have the best authority for saying that demands of England will be met in a spirit of concilliation, which will refute the refute the report that Mr. Seward, or any other member of the cabinet, has been eager to provoke a foreign war.

The Times says the secretary of the treas-

of our associated banks was held this after noon. The immediate object is given out to have been, not to confer upon the acknowledged financial wants of the government for the next six months frankly stated by Mr. Chase to be two hundred and seventy-five millions, but to arrange a matter account involving the ten or twelve millions under the negotiation of the 18th of August. After this affair was adjusted the meeting adjourned to commence again tomorrow in connection with the secretary on more important matters. It is possible that the magnitude of the real question likely to be presented, to wit, the supplying two hundred and seventy-five million dollars to the treasury, between the 1st of January and the 30th of June, on the specie basis which the proceedings of last night have declared to be the policy of the banks will be probably appreciated by a general, generous and enlightened concert with the government. It is more than possible that the operations of the treasury and the movements of the associated banks of the Atlantic cities may go forward for some time to come, if not independently on the

Amid the excitement of war he was little affected, but after the Bull Run disaster, while all were depressed in spirits, his sunk so low as to render him unfit for any duty. A large part of the time he has been in the cospital, and while the little conversation he indulged in was of her who had proved untrue, he had incessantly prayed that death might relieve him of his sufferings. The Pacific ocean is open to the free roving of Mexican privateers, and there are doubtless plenty of adventurers in the world who will take service for the sake of preying upon the rich commerce of the Indian seas. But if any such projects are on foot in the United States, we have no doubt our government will make itselfsheard in no uncertain way.

Among the latest marked expressions of OHIO HICKORY NUTS: true patriotism is the the action of E. A. Queen's Messenger to Lord Lyons.-The diplomatic corps in Washington will doubtless be put in a state of ferment for a week or ten days when it becomes known that a special messenger from the Queen is passenger by the Europa, and that he is bearer of despatches to Lord Lyons; also that the Penguin from Bermuda brings disnatches for that functionary from Admiral Milne. There is but little doubt, however, that nothing further, at present, will be done by Lord Lyons than to open up a correspondence with our government relative to the matter in dispute. The news by the Europa does not seem to disturb the government at Washington .- N. Y. Herald,

The Reasons for Inactivity.

The following is a portion of a private letter from Lieut. H. R. Clum, of this city, to a friend here. We publish it as giving the reasons probably prevailing in camp for the inactivity of the army:

Head Quarters First Brigade, Smith's Division Camp Griffin, Va., Dec. 11th, 1861.

I was somewhat astonished on reading your letter at the impatience expressed. I have, for a long while, as has almost every one here, thought the same as you do; but as far as the inacticity of the army here is concerned, I begin to think it is the quickest and surest method that can be adopted to settle the difficulty. This probably will astonish you; but let us look at it a moment. Here is an army in front of Washngton, numbering probably 100,000 or 125,000, opposed to us; a short distance at Centreville—is another of about 75,000 trongly entrenched, with a place to fall back upon-(Manassas)-that is almost impregnable. We might, and I have no doubt we could, drive them from both places; but at what a cost, think you? Probably a quarter of our forces would be killed or wounded; and what would be gained after we had driven them from both places? Why, they would fall back still farther; they would not be conquered, but simply defeated. On the other hand, suppose we should be defeated? and defeat we have here, we could repulse any number answer the question, but to a person here,

Last Night's Report.

WASHINGTON, Dec. 18. The business of the senate in the execu-tive session has been confined to referring to the appropriate committees the appoint ments made by the President during the recess of congress and heretofore published.

The proclamation of Gen. Phelps at Ship Island is condemned by all classes of politicians. It was his individual act and

must therefore be regarded accordingly.

New York, Dec. 18. Col. Mulligan had a public reception a

The Evening Post learns from commercial letters of the highest character from London that the British government proposes to seek an explanation of the affair, and perhaps an apology will be ask-ed for. No mention is made of the demand for the surrender of the rebel commission The Eaglish writers hope the subject will be treated by the United States with patience and kindly spirit.
New York, Dec. 18.

The police last evening succeeded in arresting the alleged parties on whom suspicion rested as being implicated in the death of Bernard Levy, the Canal street broker. Their names are Lewis Brydsbrough and Geo. Weiler.

WASHINGTON, Dec. 17. The steamer Reliance came up from the Potomac flotilla yesterday, and states that two new rebel batteries are erected above those heretofore reported. One of them is nearly opposite the station of the flotilla at Indian head, and the other nearly opposite the mouth of Mattawamon Creek. At both batteries heavy guns are mounted, evidently, as they threw shot over upon the Mary-The difficulty between Conway and Fouke,

To-Day's Report. [Reported Exclusively for the Daily Gazette.]

MORNING DESPATCHES. YASHINGTON, Dec. 18. Richmond and Norfolk papers of yester-day have been received. The Centerville and Fairfax county correspondent of the Richmond Dispatch writes, Dec. 15th, that the fortifications around Centerville are completed, and now present quite a formidable appearance for field fortifications .-They are built very strong, some of the works being bastioned forts, constructed in a manner that shows skillful engineering on the part of somebody, Gen. Beauregard I presume. Some care seems to have been taken with embrasures, which are built to combine convenience for handling the guns with the best method for protecting the men. They are very strongly built with hurdles and sandbags, and will stand heavy cannonading before giving way. The armaments of these forts having arrived, from a place where they make most excellent guns, they have been put in position and all that is now asked is for Gen. McClellan to bring on his Yankees. Different artillery corps are drilling in these batteries nearly every day, and some have become proficient marks men. All have attained perfectly the range of any point where a hostile battery could he planted.

to the opening of the southern ports, and recommending that no crop of cotton be seeded the ensuing year.

R. M. T. Hunter is censured by the correspondent of the Examiner, for wishing to resign his place in the cabinet to avoid the trials which possibly awaits the admin

stration. The Examiner says: Intelligence, apparently better founded than that which gencrally finds its way from Washington, has been received of an intention on the part of the military authorities of the United States to make an advance on the lines of the Potomac, and render certain another general engagement within the next ten days.

Herald's special - From the numerous dispatches that have been received here today, there is a fear expressed among the people in different parts of the country that the government may be induced by some diplomacy to give the traitors up. I have the highest authority for saying that the possibility of their surrender, under any necessity, does not now exist. The president is firm and immovable on this point.

FORT MONROE, Dec. 17, via Baltimore, Dec. 18. Special to Herald—A flag of truce has just come from Norfolk. The greatest excitement prevails in Richmond and Norfolk in regard to the news from England. How the intelligence reached Richmond I am unable to say, but they had the news this morning all over the south. A great many people, it is said, will go against England should she interfere in the affair, and demand Mason and Slidell. The Union spirit

is evidently awakening. WASHINGTON, Dec. 19. Capt. Seymour, Mr. Adams' messenger by the hand. The general acknowledged low is doubtless a forgery, as is is certain the compliment in fitting terms.

Oay purporting to be from 1 action will send a message to the senate on the subject of our relations with Great Britain, which will be considered in executive session to morrow. A rumor is affoat that the government has decided to return Mason and Slidell, but we are satisfied this is un-

true.
The Africa will carry to England a dispatch from Lord Lyons containing little more than the intelligence that he has received and delivered to the American government

his instructions from the foreign office. The senate committee on foreign affairs has the question of establishing diplomatic relations with Liberia and Hayti under advisement, and will report favorably at an early day.

Washington, Dec. 18. Times special.—A cabinet meeting was held to day, at which the English question was discussed, of course informally. There was but one sentiment, that no quarrel with England must be permitted to interfere a moment to stay the reduction of the rebels. I have the best authority for saying that demands of England will be met in a spirit of concilliation, which will refute the refute the report that Mr. Seward, or any other member of the cabinet, has been eager to provoke a foreign war.

A resolution offered in the Washington city council, favoring the aboltion of slavery in the District of Columbia, was laid on the table by vote of 9 to 4. NEW YORK, Dec. 19.

The Times says the secretary of the treas ury is in town and another general meeting of our associated banks was held this afternoon. The immediate object is given out to have been, not to confer upon the ac enowledged financial wants of the government for the next six months frankly stated by Mr. Chase to be two hundred and sev nty-five millions, but to arrange a matter account involving the ten or twelve millions under the negotiation of the 18th of Au gust. After this affair was adjusted the meeting adjourned to commence again to-morrow in connection with the secretary on nore important matters. It is possible magnitude of the real question likely to be presented, to wit, the supplying two hundred and seventy-five million dol lars to the treasury, between the 1st of Jan uary and the 30th of June, on the specie pasis which the proceedings of last night have declared to be the policy of the banks will be probably appreciated by a general generous and enlightened concert with th rovernment. It is more than possible that he operations of the treasury and movements of the associated banks of the Atlantic cities may go forward for some time to come, if not independently on the desired basis.

FORT MONROE, Dec. 18, via Baltimore, Dec. 19.

The steamship S. R. Spaulding, which left Port Royal last Sunday, arrived at an early hour this morning. She stopped at early hour this morning. She stopped at Hatteras, leaving that place yesterday, and brings a mail and passengers. Everything is quiet at Hatteras. Nothing has happened to disturb the usual monotony there, except the usual storms.

The schooner Charity, said to be owned by Senator Simmons, of Rhode Island, arrived on the 15th inst, with an assorted cargo, including a large proportion of whiskey. She also took a collector to Hatteras, and on arriving he procured a building from the commissary which he proposed using as a custom house. The Charity's papers, however, were very irregular, and on the 17th inst., Capt. Warden of the steamer Stars and Stripes took the Charity as a prize to New York.

There is little news of interest from Port Royal. The federal troops have fully occu-pied the town of Beaufort. Large quantities of cotton continued to be gathered and brought to the coast.

By a flag of truce to-day we have a Richmond paper of this morning. We extract from it the following news:

NASHVILLE, Tenn., via New Orleans, Dec. 17. The Bowling Green correspondent of the Union and American, says:—The Yankees advance force of from 5,000 to 6,000 are at Green river with some artillery, but have hown no disposition to cross the river .-They are repairing the bridge.

Smith's landing, Kentucky.

A despatch from Frankfort, dated the 9th inst., says that Gen. Crittenden was at Cumberland Gap, on Saturday, with a large force, and that 5,000 men at Morristown would join bim. It is feared that Genera Crittenden will invade Kentucky from the point.

The Brownville, Texas, Flag, of the 15th gives an account of an attack on the city of Metamoras by Gen. Caravajal. He commenced the attack on the 20th; great car nage took place, and at the hour that the Flag went to press, both parties claimed Buccess.

From the Second Regiment,

The army correspondent of the Milwaukee Sentinel, in the second regiment, gives the following items:

A second death by disease has taken place in the second—that of Martin V. Flanders, of East Troy, a private in Captain Langworthy's company. Flanders has been unable to do duty since Bull Run. On Wednesday he was taken from the camp to Georgetown hospital, and on Thursday morning he died. He was buried on Thursday afternoon.

There was something singular about the case. Flanders was well off at home, and engaged to be married to a young lady in Troy, but on the Sunday previous to the marriage the young lady married another Flanders took the matter deeply at heart, and soon after enlisted. Amid the excitement of war he was little affected but after the Bull Run disaster, while all were depressed in spirits, his sunk so low as to render him unfit for any duty. A large part of the time he has been in the hospital, and while the little conversation he indulged in was of her who had proved untrue, he had incessantly prayed that death might relieve him of his sufferings. When able to do duty none were more ready or willing than he, and his comrades will mourn his loss severely.

Did I ever tell you how a Wisconsin boy, a sergeant, worked his way into the regular

army? I think not, but I will. I refer to Lieutenant Potter of Oshkosh. He enlisted in Capt. Bouck's company, and was promoted to sergeant. While we were at Chain bridge, Gen. McClellan visited the camp, and was accompanied by Secretary Cameron, and Mr. and Mrs. Gov. Curtin, of Pennsylvania. Potter was acquainted with Mrs. Cortin, so when the carriage stopped he made his way through the crowd and told her what he wanted. Mrs. Curtin turned to the secretary and asked : "Mr Cameron, did you ever do me a fa-

No, I never did," was the reply.

"Then I want you to now." "It is granted, without the asking," was the gallant reply.
"Then you will appoint Mr. Potter a icutenant in the regular army.'

Soon Potter called upon the secretary in his office. Mr. Cameron turned to his head clerk and said-

Fill out a commission for Mr. Potter." "There are no second lieutenant vacan-cies," replied the clerk.
"Then give him a first lieutenancy."

"There is but one vacancy. Come in next week, and I will give it to you." " No, sir," said the secretary sternly, for he knew if laid over until next week that would be the last of the matter. "Do it

now, as Lieut. Potter will wait." Licut. Potter did wait, and when he left the office it was with a first lieutenancy in the United States army in his pocket, and soon after he was sent home recruiting for the regular army.

WHAT AN IRON-PLATED STEAMER 18. We copy from the Philadelphia Ledger. a description of an iron-plated steamer now being built in that city for the govern

The plates are 15 feet long, 28½ and 30½ inches wide, and 4 inches thick. A two and a half ton hammer is required in their manufacture, Some doubt has been expressed as to the ability of any iron works n these parts to turn out such plates; but we understand that there is no difficulty about it. After being received at the foundry the plates are planed, the edges and ends being made straight and smooth and grooved like a flooring-board. The groove is one inch wide by half an inch deep. Screws are to be used in fastening the plates to the planking of the ship.-They are to be put in from the inside of the vessel, and are not to go through the plates.
The vessel is to be covered with the plates four feet under water, and three feet above it, and they are to extend 85 feet fore and aft of the centre line, which will make 370 feet of planking. The iron is to come up to a line with the spar deck, above which there will be a light rail. The sides of the ship, with a view to cause the shot to glance, will have an angle of 30 degrees from 3 feet above the load line.

In order to carry this extra weight the ship has to be large. The tonnage of the one under contract is to be three thousand five hundred. She will be two hundred and hirty feet long, sixty feet beam, and have a draught of fourteen feet. In her con-struction she will be different from the French ship La Gloire, about which so much has been written. The French is very deep in the water, while the vessels to be built here will be almost flat bottomed, which, notwithstanding the additional weight, will make her of light draught.— Her machinery will be much the same as that of a first-class sloop of war, except that she will have four, boilers and a blower .-The latter is to make the boilers to steam even though the smoke stack should be shot away.

MEXICAN PRIVATEERS TO BE FITTED OUT AT New York.—A startling rumor was heard on 'Change on Friday afternoon. It was to the effect that letters of marque were accually in the hands of parties in this city, designed for vessels to be purchased and used as privateers in the Mexican service against the commerce of England and Spain. Although the rumor could not be traced to any direct evidence, it was credited by many merchants, and it was the subject of considerable discussion. We do not accept it as true.

The plot of war thickens on the ocean,

as the English, French and Spanish fleet approaches the shores of Mexico. The acific ocean is open to the free roving of Mexican privateers, and there are doubtless plenty of adventurers in the world who will take service for the sake of preying upon the rich commerce of the Indian seas But if any such projects are on foot in the United States, we have no doubt our government will make itself heard in no uncertain way.

Among the latest marked expressions of rue patriotism is the the action of E. A. Stevens, of Hoboken, the commodore of the New York yacht squadron; who has built an iron vessel, of a very peculiar character, fully armed and equipped, which he will present to the United States gov-ernment, through Mr. Chase, the secretary of the treasury. Mr. Stevens not only builds but arms her, and in fact, turns her ver to Mr. Chase ready for active service. without costing the government one dollar.

MEMBER OF ASSEMBLY DEAD .- The governor has issued a proclamation for a special election, on the 7th of January, 1862, to fill a vacancy in the assembly occasioned by the death of S. D. Powers. This is the first notice we had seen of the death of Mr. Powers. He was a republican, and we think was elected from Sparta, in Monroe county. We have known Mr. Powers for many years. He once represented Washington county in the assembly. He has always been esteemed a man of integrity as well as ability. His death is a public calamity.

O. A. Brownson lectured at Washington last week on the "National Crisis." He said that while he had been no abolitionist, more export demand, sales 60,000 bushels, he was in favor of abolishing slavery in a war for the Union, and in the event of a reconstruction, to put the question entirely out of the way as a political one,

E QUEEN'S MESSENGER TO LORD LYONS .-The diplomatic corps in Washington will doubtless be put in a state of ferment for a week or ten days when it becomes known that a special messenger from the Queen is passenger by the Europa, and that he is bearer of despatches to Lord Lyons; also that the Penguin from Bermuda brings dispatches for that functionary from Admiral Milne. There is but little doubt, however, that nothing further, at present, will be done by Lord Lyons than to open up a correspondence with our government relative to the matter in dispute. The news by the Europa does not seem to disturb the government at Washington.—N. Y. Herald, Dec. 16.

A New Arrangement.

On the 1st of next January a one be prepared when called on. No one change will be made in the proprietorship of the Gazette Office by the withdrawal of Mr. Bowen. This change will render absolutely necessary a settlement of the subscriptions and other accounts due the present firm. We hope our friends will give this matter their immediate attention, and leave as few debts as possible for settlement after the change is made. It will be easier and better to all concerned to settle before that time, as a settlement must be made.

Unlike the Gazette, the Advocate does not charge the publication of the figures in question to a desire to make this county appear to have done more proportionately than its neighbors. It is a little strange, however, that seve-

ral presses in the state persist in treating our publication of the statistics of the first twelve regiments as if we had represented that they showed the entire quota of volunteers furnished to the state. - Madison Journal. If the Advocate did not charge the Jour-

nal with "a desire to make Dane county appear to have done more proportionately Reported for the Janesville Gazette, than its neighbors," it was not for want of a good reason to do so. The Journal accompanied the original publication of its partial statistics with the remark that-"It will be seen that Milwaukee has raised the greatest number and Dane county comes next. This accords with their rank in population. Some counties make a

meagre showing in proportion to what they should have done." We do not wonder that the Journal

winces under the exposure of its unfair comparison and unjust claims for Dane county. If it had any candor it would acknowledge its injustice, and admit the propriety of the complaints of its cotemporaries whose localities it disparaged. Its taking in the 11th, which is designated the Dane regiment, and excluding the 13th, for which Rock county furnishes seven of the ten companies, was particularly unjust to Rock, and made the boastful com-

Unlike the Gazette, the Advocate does not charge the publication of the figures in question to a desire to make this county appear to have done more proportionately than its neighbors.

It is a little strange, however, that several presses in the state persist in treating our publication of the statistics of the first twelve regiments as if we had represented that they showed the entire quota of volunteers furnished to the state .- Madison

If the Advocate did not charge the Journal with "a desire to make Dane county appear to have done more proportionately than its neighbors," it was not for want of a good reason to do so. The Journal accompanied the original publication of its partial statistics with the remark that-"It will be seen that Milwaukee has raised the greatest number and Dane county comes next. This accords with their rank

in population. Some counties make a meagre showing in proportion to what they should have done." We do not wonder that the Journal

winces under the exposure of its unfair comparison and unjust claims for Dane county. If it had any candor it would acknowledge its injustice, and admit the propriety of the complaints of its cotemporaries whose localities it disparaged. Its taking in the 11th, which is designated the Dane regiment, and excluding the 13th, for which Rock county furnishes seven of the ten companies, was particularly unjust to Rock, and made the boastful comparison in favor of Dane county offensive,

The 10th Wisconsin regiment is now at Elizabethtown, on the Louisville and Nashville railroad, forty-three miles from Louisville.

To Our Debtors.

It will be seen by a notice in another column, that on the first of January next there will be a change in the proprietorship of the Gazette. The NECESSITY of a settlement of ALL our accounts will be apparent to all who will give the subject their attention, and as our own convenience will be materially promoted by a settlement before the dissolution of the partnership, and the interest of no debtor will be injured by doing in season what must come at last, we hope there will be no request or attempt at delay. > COL. RUGER PROVOST MARSHAL OF FREDERICK.—Col. Ruger, of this city, and commander of the third regiment, has been appointed Provost Marshal of Frederick, Md. A correspondent of the Sentinel, speaking of it, says:-

We are once more near our old camping ground in the city of Frederick. The other regiments of this division of the army are located round about the city at various distances of four to six miles. Our locadistances of four to six miles. Our location here is owing to the appointment of our colenel (Ruger) to the honorable position of provost marshal. The reputation of our men for order and sobriety, and of their commander as a disciplinarian, acquired during their former encampment have induced the record of this city are here, induced the people of this city earnestly to seek this arrangement. General Banks' headquarters are here, as also those of Gen. Hamilton. How long we will remain here is of course uncertain. We still dwell in tents, and should the summer like weather of the past few days continue, we should want nothing better. But this we cannot expect, and intimations have been given that we shall soon need more substantial habitations. The health of the regiment is improving.

20 Col. C. C. Washburn reports six sompanies of his regiment now in camp, and 948 men enlisted.

ARRIVAL OF ARMS .- One hundred and thirty-eight cases of muskets, 2,760 in number, arrived at Milwaukee last Tuesday for Gov. Randall. This will go far towards supplying the arms lacking for this state.

The Atlantic, Godey, Peterson, Bal. lou, Nick Nax and Yankee Notions for January, 1862, have been received at King's News Room, four doors below the postoffice.

THE PARTY LAST NIGHT .- The party given to the officers of the 13th regiment last night was one of those social gatherings which are long and pleasantly remembered. The company was just large enough to be full and not crowded, and the arrangements were all well made and well carried out. A profusion of military uniforms always gives life and variety to a ball room, and when, as in this instance, the freedom of social intercourse is united, a dance has all the agreeable characteristics ever found in such a party. There will be abundant reasons for mutual pleasant recollections when the duties of an ac-A CARD.-Wishing to make an acknowl. | tive campaign separate the regiment from

Losses in Battle.—At Austerlitz the French lost 14 men out of every 100, the and the Austrians 14 out of every 100. At At Bautken the French 23, Russians 14. At Waterloo the French 36, Allies 31. At Magenta, June 4th, 1859, the French 7. At Solferino the French and Sardinians 10. the Austrians 8. It is somewhat remarkable in the last example, that the army which was best provided with rifled arms did less damage than the one which was equipped in the old style.

The Boston Free Public Library now ontains 97.386 volumes, about one sixth of which have been added during the past year. This includes Theodore Parker's munificent bequest of 11,000 volumes. CAPITAL AND SURBLES,

THE above are First Class, justly papellar, and prompt
I paying companies. They invite investigation into
their condition and solicit business entirely upon their
real merits. In point of solveney and reliability and
homorable dealing, they have but fou equals, and no asperiors. They are founded upon the very best securities
in the world—first class bonds and mortgages upon
property in New York and Brooklyn—securities that
have not, for the past ten years, depreciated below par,
and are every way more reliable and permanent than
railroad, bank, and other stocks, which are subject to
the fluctuations of the market, and lisble, in times of
paste, as the experience of the past teaches, to become
almost, find entirely, valueless. And while there are
Companies entering the field of comportition woll calculated to mislead by publishing partial and considered
statements of their condition, and without a cash surplus on hand sufficient to reinsure their outstanding
ricks, the above named companies always have and keep
over and above their capital twice the amount, and in
most instances four times, needed for the reinsurace of
all their risks. With such a foundation, and with such
a condition, they claim the right to look with confidence
to the public for hieral patronage.

Policies issued without delay, and farms rights for a
series of years taken at less rates than can be done by
Withal Companies, and a certainty given instead of an
wneertainty. All losses promptly adjusted and paid.

New York Life Insurance Company. CABE CAPITAL OVER - - \$1,900,000 all well invested for the benefit of Pelley holders, so that the profits of this vast sum pay a large proportion of their annual preniums. This is unquestion sluy fine very best Life Company doing business in this state.

New York Dry Goods Market.

COTTON AND COTTON FABRICS.-Great advance in prices. For a week past the cotton market has been in a feverish state of excitement. The price has advanced to Freight Train, 31½ cents, and the tendency is still upward. The quantity on the market for sale is reduced to less than 10,000 bales, which is to tally inadequate to the wants of the mills for the next six months. In this condition of things it is difficult to see what is to stop the advance. Many sound and judicious parties are strongly of the opinion that it parties are strongly of the opinion that it will not stop much short of the price of wool, which is now standing at 48c to 50c. It is argued that if the war should cease and free access be obtained to all the cotton ports within a month, that still the market would be sustained, for the reason that the cotton is in no shape for shipment and could not be got ready for a month or two. Furthermore, that a powerful demand from Europe, as well as our own country, would spring up; and that the demand for goods from the south, together with the demand from the north, consequent upon the restoration of peace, would sweep the market of all manufactured cotton goods now on hand, and all that could possibly be got into the market during the next three months. But Night Express Leaves market during the next three months. But the prevalent opinion is that the war will not cease at present, and that the demand for goods will continue to increase. The country is believed to be bare of goods, and the disbursement of the government have been and will continue to be so large that business throughout the whole country is gradually improving. People have gradually become relieved from the apprehensions that existed ninety days since, that the war was likely to destroy all material prosperwas likely to destroy all material prosper-

ity.

Cotton goods, in sympathy with the raw material, have rapidly advanced. In addition to the advance in the raw material there is the fact that no cotton goods of any consequence are now being made, and the market is getting rapidly cleared out of the old stock. Two-thirds of the mills are said to have no cotton, or running on army goods, and if that were not so, it is claimed that at the present price of cotton it would be impossible to produce goods at anything ike the prices at which they are being sold.

Printing cloths have advanced to 8½ and

cents, and it is confidently asserted that they must and will go up to 10 cents .-Prints that a month ago were sold at 9 cents are now held at 12 cents. The Merrimack print, which is the standard, is now selling at 12½ cents, Sprague 12 cents, American 11½ cents, Phillip Allens 11 cents, Union 10½ cents, and all others in proportion. Oxford Denims are firm at 13te, Kentucky Jeans, that were sold in September at 123 to 14c, are now held at 20 cents, and no anxiety is exhibited to sell even at that, the holders declaring that they are sure of getting 25c, and expect to get 30c. Standard brands of heavy sheetings, such as Lawrence C. Stark, Appletons, Indian Head, etc., are held at 15c, and still tending upward. At the present price of cotton we are assured by reliable authority that such a sheeting as the Starkmills carnot be made for less than 16c. In the natural course of trade the manufacturers will not long continue to sell a staple article of general use for less than it can be produced.—N. 1. World, 12th.

NARRATIVE OF THE ESCAPE OF A FEDE-RAL OFFICER FROM RICHMOND .-- Col. De-Villiers, of the 11th Ohio regiment, recently escaped from Richmond, and on Wednesday evening last told his story before a St. Louis, &c., and run through to New York without ly escaped from Richmond, and on Wedlarge audience in Cincinnati. He was captured by the confederates at the skirmish of Scarey Creek, in western Virginia, and was immediately sent to Richmond and put in jail. Jail life not agreeing with his consti-tution, he made various efforts to escape, and finally succeeded. Here is the narra-

"He stole the coat and hat of a secession officer, and in that garb passed the guard. About six miles from Richmond he was encountered by a guard, and to his challenge he replied, 'A friend without the countersign. (He had taken the precau-tion to lay down the double barreled shotgun which he contrived to get before he escaped from Richmond, before he approachd this guard. He had, besides, a revolver bowie knife.) Approaching, they and a asked him where he was from and whither he was going. He replied from Richmond to Petersburg. They then asked him why he did not take the railroad, and he said he missed the cars. They then took him in custody, and marched, one each side of him, upon a narrow bridge crossing a stream near at hand. The situation was desperate but he was determined never to go back to Rickmond alive; so when we got to about the middle of the bridge he struck to the right and left, knocking one of the guard on one side and the other on the other, and giving them both a good swim! Hence he made his way towards Petersburg, subsisting for three days upon nothing but a few

raw beans. "Upon this tramp, for a distance of sixty five miles, he carried his skiff for cross ing rivers (a pine board) upon his shoulders. During his travels he was several times shot at. When he got in the neighborhood of Magruder's forces, his hardest time began. He tried to pass sentinels several times, and at one time was twice shot at in quick succession. He shot too. He did not know whether he hit the two sentinels or not, but they never answered. But the whole brigade was aroused, and he took to the James river in what he called his skiff, namely, his pine board compan-ion. He landed on the other side in a swamp, re-crossing again near Jamestown, when he lost his gun. He had cast away his officer's coat, and it may well be imagined that what remained of his suit was by this time rusty enough. So he took an open course and resolved to ask for work He hired with a German blacksmith at a dollar and a half a week, having concluded to remain awhile and learn something of the condition of the rebel forces. He staid a fortnight, observing all the rebel movements. At the expiration of this time he got tired of blacksmithing and wanted to go home. He found a good German Union man, to whom he told his story without reservation, just as he was telling it here to-night. This was of great service to him; he led him for nine days, the colonel having adopted another Yankee trick, and made a blind man of himself; he couldn't see, and the German was his guide. Dropping the Yankee French, he became a French subject, and wanted to go back to France, because he could not get any work to do here; and so he told Gen. Huger

Reduced to \$75. Singer's Letter A Machine,

8 the best Machine in the word for Family Sewing and Light Manufacturing purposes; Price, (with lemmer,) and beautifully ornamented, FIFTY DOLLARS.

The Nos. 1 and 2 machines are of great capacity and application for manufacturing purposes.

Our No. 3 machines are especially adapted to all kinds of light and heavy

LEATHER WORK, BRUSHES AND COMBS in Carriage Trimming, Boot and Shoe Making, Harness Making, etc., etc. They are of extra size, with an am long enough to take under it and stitch the largest sized dashes. There is scarcely any part of a Trimmers' stitching that cannot be better done with them than by band; so, too, the saving of time and labor is very great. The table under these machines is 24 incheelong, and the shuttle will held six times the usual quantity of thread. The large machines work as fast as small ones.

We would ask for our Letter A machines, the special attention of Vest Makers and Dress Makers, and all those who want machines for Light Manufacturing purposes. They embody the principles of the standard machines, making like them, the interlock stitch, and are destined to be as celebrated for Family Sewing and light manufacturing purposes as our standard machines are for manufacturing purposes in general. Carriage Trimming, Boot and Shoe Making, Har-

bines are for manufacturing purposes in general. We have always on hand Hemming Guages, Silk Twist, Linen

and Cotton Thread on Spools, Best

Machine Oil in Bottles, etc., etc. We manufacture our own Needles, and would warn all persons using our machines not to buy any others. We know that there are needles sold of the most inferior quality, at higher prices than we charge for the best. The needles sold by us are manufactured especially for our machines. A bad needle may render the best machine almost useless.

Our customers may rest assured that all our Branch Offices are furnished with the

GENUINE ARTICLE. In case of small purchases, the money may be sent in postage stamps or bank notes.

So Correspondents will please write their names distinctly. It is all important that we should in each case know the post office, county and state.

All persons requiring information about Sewing Machines, their size, prices, working capacities, and the test methods of purchasing, can obtain it by sending to us, or any of our Branch Offices for a copy of

1. M. SINGER & CO.'S GAZETTE, which is a beautifully illustrated Pictorial Raper, will be sent Gratis

We have made the above Reduction in Prices with the two fold view of benefitting the public and ourselves. The public have been swindled by spurious machines made in limitation of ours. The metal in them, from the iron custing to the smallest place, is of poor quality. Their makers have not the means to do their work well. They are hid away in secret places, where it would be impossible to have at their command the proper machanical appliances. It is only by doing a great business, and having extensive manufacturing establishments, that good machines can be made at moderate prices. The best designed machines, Radly Made, are always lable to get out of order, and are sure to cost considerable trouble and money to keep them in repair. The qualities to be looked for in a machine are: certainty of correct action at all rates of speed, simplicity of construction, great durability and rapidity of operation, with the least labor. Machines to combine these essential qualities, must be made of the best metal and finished to perfection. We have the ways and means, on a grand scale, to do this.

The purchasers of machines, whose dally bread it may concern, will find that those having the above qualities not only work well at rapid as well as along rates of speed, but faul long in the finest possible working order. Our machines, as made by us, will carn more money with less labor than any others, wheter in imitation of ours or not. In fact, they are cheaper than any other machine as a gift.

Another General to be Modified.

Gen. Phelps, who recen'ly landed at Ship Island, about seventy-five miles south-east of New Orleans, with aportion of Butler's expedition, has been doing something "irregular" which has deadfully scared the rebels of that region, and at the same time frightened the doughfaces at Washington. He has thrown a shell or two into both camps. A battle was reported at Columbus, three or four days ago, to be going on at New Orleans, and there was a loud call for help. Several regiments and three gunboats were despatched from Columbus with all speed. Who is pitching into the rebels at New Orleans, we do not know-we can only conjecture that it is Gen. Phelps. We learn from Washington that he has been issuing a proclamation, which all the politicians at the federal capital repudiate, on account of its anti-slavery sentiments .-The Washington gentlemen have already hastened to make their record clear by throwing the responsibility upon General Phelps. On that account we think there must be something vigorous and sensible about it, and we feel inclined to approve of thing that will stir up indignation and alarm at both points must be good.

Charley, you are an "abolitionist," a regular " curly-haired" and entitled to all the honors as such.—Madison Patriot.

This is the kind of answer we get for re publishing the "abolition howl" of the Pat riot on the 26th of last April, in contrast with its present pro-slavery "howling." By the way, if the Patriot will tell us what office or official favor we have ercr asked at the hands of the federal administration, it sessed by any person connected with the

Licutenant General Scott arrived in Havre on the 21st ult. On the following morning the American ship captains waited upon him in a body, to shake the veteran by the hand. The general acknowledged the compliment in fitting terms.

The Reasons for Inactivity.

The following is a portion of a private etter from Lieut. H. R. Clum, of this city, to a friend here. We publish it as giving the reasons probably prevailing in camp for the inactivity of the army:

HEAD QUARTERS FIRST BRIGADE, SMITH'S DIVISION, Camp Griffin, Va., Dec. 11th, 1861.

I was somewhat astonished on reading your letter at the impatience expressed. I have, for a long while, as has almost every one here, thought the same as you do; but as far as the inacticity of the army here is concerned, I begin to think it is the quickest and surest method that can be adopted to settle the difficulty. This probably will astonish you; but let us look at it a moment. Here is an army in front of Washington, numbering probably 100,000 or 125,000, opposed to us; a short distance at Centreville—is another of about 75,000 strongly entrenched, with a place to fall impregnable. We might, and I have no doubt we could, drive them from both places; but at what a cost, think you? Probably a quarter of our forces would be killed or wounded; and what would be gained after we had driven them from both places? Why, they would fall back still farther; they would not be conquered, but simply defeated. On the other hand, suppose we should be defeated? and defeat would not be impossible, for let me tell you, it takes but a few men behind good breastworks, and in good forts, to repulse a large army. I have no doubt, that with the force we have here, we could repulse any number the rebels could bring against us. I suppose you would say, then why keep so many men just to guard Washington?-Well, I don't know as I can satisfactorily

Again you complain of the slowness of the navy. Why man, what navy did we have when this war commenced, and whore was what we did have? Scattered from Dan to Bersheba, (that's scripture ain't it?) and it has required a large amount of labor and time to get it together and increase it to its present magnitude. Gen. Phelps has chosen the right interests of each one's state, do you not see point for such a demonstration. He is so what the army here could then do? Why, far away from headquarters that he may be simply to start and clean everything before able, by a few Napoleonic movements, to it; and clean it, too, in such a manner that conquer a peace in Louisiana before orders it would stay cleaned-not as it was done in Missouri, driven out of the state and as soon as your back is turned, have the rebels flocking back, thick as ever. The Madison Journal learns from a private letter that there has been some trouble between our 8th and 11th regiments at Camp Curtis, Missouri. Col. Last Night's Report.

WASHINGTON, Dec. 18. The business of the senste in the executive session has been confined to referring to the appropriate committees the appoint ments made by the President during the recess of congress and heretofore published. The proclamation of Gen. Phelps at Ship Island is condemned by all classes of politicians. It was his individual act and must therefore be regarded accordingly.
NEW YORK, Dec. 18.

Col. Mulligan had a public reception at

the City Hall to-day.

The Evening Post learns from commercial letters of the 'highest character from London that the British government proposes to seek an explanation of the Trent affair, and perhaps an apology will be asked for. No mention is made of the demand back upon-(Manassas)-that is almost for the surrender of the rebel commissioners. The Eaglish writers hope the subject will be treated by the United States with patience and kindly spirit. New York, Dec. 18.

The police last evening succeeded in arresting the alleged parties on whom sus-picion rested as being implicated in the death of Bernard Levy, the Canal street broker. Their names are Lewis Brydsbrough and Geo. Weiler.

WASHINGTON, Dec. 17. The steamer Reliance came up from the Potomac flotilla yesterday, and states that two new rebel batteries are erected above those heretofore reported. One of them is nearly opposite the station of the flotilla at Indian head, and the other nearly opposite the mouth of Mattawamon Creek. At both batteries heavy guns are mounted, evidently, as they threw shot over upon the Maryland shore.
The difficulty between Conway and Fouke

Secretary Seward this morning gave it as his opinion that no foreign war would take place. The remark was made in conversa-tion with a distinguished Englishman. CAIRO, Dec. 16.

The grand review and inspection of troops at Cairo, Bird's Point and Fort Holt, took place to day, by Gen. Van Rensselaer, attended by Gens. Sturges, Sweency, Grant and McCleruand. The troops at all points performed admirably. The force reviewed at Cairo was 8,000; at Bird's Point 6,000, and at Fort Holt 3.000. Gen. Van Rensse laer goes to Paducah to-morrow, and to Cape Girardeau on Wednesday to inspect the troops.

Scouts were thrown out in a circle ranging from Belmont to Charleston, on Saturday night, without discovering any enemy. BALTIMORE, Dec. 17.

MORNING DESPATCHES. WASHINGTON, Dec. 18. Richmond and Norfolk papers of yester-day have been received. The Centerville and Fairfax county correspondent of the Richmond Dispatch writes, Dec. 15th, that the fortifications around Centerville are completed, and now present quite a formidable appearance for field fortifications.-They are built very strong, some of the works being bastioned forts, constructed in a manner that shows skillful engineering on the part of somebody, Gen. Beauregard I presume. Some care seems to have been taken with embrasures, which are built to combine convenience for handling the guns with the best method for protecting the men. They are very strongly built with hurdles and sandbags, and will stand heavy cannonading before giving way. The arma ments of these forts having arrived, from a place where they make most excellent guns. they have been put in position and all that is now asked is for Gen. McClellan to bring on his Yankees. Different artillery corps are drilling in these batteries nearly every day, and some have become proficient marks men. All have attained perfectly the range of any point where a hostile battery could

be planted. A series of resolutions have been adopted by the legislature of Tennessee, relative to the opening of the southern ports, and recommending that no crop of cotton be seeded the ensuing year.

R. M. T. Hunter is censured by the correspondent of the Examiner, for wishing to resign his place in the cabinet to avoid the trials which possibly awaits the admin istration.

The Examiner says: Intelligence, appa rently better founded than that which gen erally finds its way from Washington, has been received of an intention on the part of the military authorities of the United States to make an advance on the lines of the Po tomac, and render certain another general engagement within the next ten days.

Herald's special - From the numerous dispatches that have been received here to day, there is a fear expressed among the people in different parts of the country that the government may be induced by some diplomacy to give the traitors up. I have the highest authority for saying that the possibility of their surrender, under any necessity, does not now exist. The president is firm and immovable on this point.

FORT MONROE, Dec. 17, via Baltimore, Dec. 18. Special to Herald-A flag of truce has ast come from Norfolk. The greatest excitement prevails in Richmond and Norfolk in regard to the news from England. How the intelligence reached Richmond I am unable to say, but they had the news this morning all over the south. A great many people, it is said, will go against England should she interfere in the affair, and demand Mason and Slidell. The Union spirit

is evidently awakening. WASHINGTON, Dec. 19. Capt. Seymour, Mr. Adams' messenger, arrived about midnight. The president 1,29 good Chicago spring; 1,31 Milwan-

Washington, Dec. 18. Times special.—A cabinet meeting was held to-day, at which the English question was discussed, of course informally. There was but one sentiment, that no quarrel with England must be permitted to interfere a moment to stay the reduction of the rebels. I have the best authority for saying that demands of England will be met in a spirit of concilliation, which will refute the refute the report that Mr. Seward, or any other member of the cabinet, has been eager to provoke a foreign war.

A resolution offered in the Washington city council, favoring the aboltion of slavery in the District of Columbia, was laid on the table by vote of 9 to 4. NEW YORK, Dec. 19.

The Times says the secretary of the treasury is in town and another general meeting of our associated banks was held this afternoon. The immediate object is given out to have been, not to confer upon the ac-knowledged financial wants of the government for the next six months frankly stated by Mr. Chase to be two hundred and seventy-five millions, but to arrange a matter account involving the ten or twelve millions under the negotiation of the 18th of August. After this affair was adjusted the meeting adjourned to commence again tomorrow in connection with the secretary on more important matters. It is possible that the magnitude of the real question likely to be presented, to wit, the supplying two hundred and seventy-five million dollars to the treasury, between the 1st of January and the 30th of June, on the specie basis which the proceedings of last night have declared to be the policy of the banks, will be probably appreciated by a general generous and enlightened concert with the government. It is more than possible that the operations of the treasury and the movements of the associated banks of the Atlantic cities may go forward for some time to come, if not independently on the desired basis.

FORT MONROE, Dec. 15, via Baltimore, Dec. 19. } The steamship S. R. Spaulding, which left Port Royal last Sunday, arrived at an early hour this morning. She stopped at early hour this morning. She stopped at Hatteras, leaving that place yesterday, and brings a mail and passengers. Everything is quiet at Hatteras. Nothing has happened to disturb the usual monotony there. except the usual storms.

The schooner Charity, said to be owned by Senator Simmons, of Rhode Island, arrived on the 15th inst, with an assorted cargo, including a large proportion of whiskey. She also took a collector to Hatteras, and on arriving he procured a building from the commissary which be proposed using as a custom house. From the Second Regiment.

The army correspondent of the Milwaukee Sentinel, in the second regiment, gives the following items:

A second death by disease has taken place in the second—that of Martin V. Flanders, of East Troy, a private in Captain Langworthy's company. Flauders has been unable to do duty since Bull Run. On Wednesday he was taken from the camp to Georgetown hospital, and on Thursday morning he died. He was buried on Thursday afternoon.

There was something singular about the ease. Flanders was well off at home, and engaged to be married to a young lady in Troy, but on the Sanday previous to the marriage the young lady married another man, Flauders took the matter deeply at heart, and soon after enlisted. Amid the excitement of war he was little affected. but after the Bull Run disaster, while at

were depressed in apirits, his sunk so low as to render him unfit for any duty. A large part of the time he has been in the hospital, and while the little conversation he indulged in was of her who had proved untrue, he had incessantly prayed that death might relieve him of his sufferings. When able to do duty none were more ready or willing than he, and his comrades

will mourn his loss severely.

Did I ever tell you how a Wisconsin boy, a sergeant, worked his way into the regular army? I think not, but I will. I refer to Lieutenant Potter of Oshkosh. He enlisted in Capt. Bouck's company, and was premoted to sergeant. While we were at Chain bridge, Gen. McClellan visited the camp, and was accompanied by Secretary Cameron, and Mr. and Mrs. Gov. Curtin, of Pennsylvania. Potter was acquainted with Mrs. Curtin, so when the carriage stopped he made his way through the crowd and told her what he wanted. Mrs. Curtin turned to the secretary and asked: " Mr Cameron, did you ever do me a fa-

"No, I never did," was the reply.

"Then I want you to now." "It is granted, without the asking," was

the gallant reply.

"Then you will appoint Mr. Potter sieutenant in the regular army."

Soon Potter called upon the secretary in is office. Mr. Cameron turned to his head elerk and said-" Fill out a commission for Mr. Potter."

"There are no second lieutenant vacan cies," replied the clerk.
"Then give him a first lieutenancy." "There is but one vacancy. Come is

next week, and I will give it to you." "No, sir," said the secretary sternly, for he knew if laid over until next week that would be the last of the matter. "Do it now, as Lieut. Potter will wait."

Lient. Potter did wait, and when he left the office it was with a first lieutenancy in the United States army in his pocket, and soon after he was sent home recruiting for he regular army.

WHAT AN IRON-PLATED STEAMER IS.-We copy from the Philadelphia Ledger, a description of an iron-plated steamer now being built in that city for the govern-

The plates are 15 feet long, 28½ and 30½ inches wide, and 4 inches thick. A two and a half ton hammer is required in their manufacture, Some doubt has been ex pressed as to the ability of any iron works n these parts to turn out such plates; but we understand that there is no difficulty bout it. After being received at the foundry the plates are planed, the edges and ends being made straight and smooth. and grooved like a flooring-board. The groove is one inch wide by half an inch leep. Screws are to be used in fastening the plates to the planking of the ship. They are to be put in from the inside of the vessel, and are not to go through the plates. The vessel is to be covered with the plates four feet under water, and three feet above it, and they are to extend 85 feet fore and aft of the centre line, which will make 370 feet of planking. The iron is to come up There is little news of interest from Port to a line with the spar deck, above which there will be a light rail. The sides of the ship, with a view to cause the shot to glance, will have an angle of 30 degrees

from 3 feet above the load line. In order to carry this extra weight the ship has to be large. The tonnage of the one under contract is to be three thousand five hundred. She will be two hundred and thirty feet long, sixty feet beam, and have Union and American, says:—The Yankees a draught of fourteen feet. In her con-advance force of from 5,000 to 6,000 are at struction she will be different from the struction she will be different from the Green river with some artillery, but have French ship La Gloire, about which so much has been written. The French is very deep in the water, while the vessels to be built here will be almost flat bottomed, which, notwithstanding the additional weight, will make her of light draught.— Her machinery will be much the same as that of a first-class sloop of war, except that she will have four, boilers and a blower .even though the smoke stack should be shot away.

MEXICAN PRIVATEERS TO BE FITTED OUT AT New York.-A startling rumor was heard on 'Change on Friday afternoon. It was to the effect that letters of marque were actually in the hands of parties in this city, designed for vessels to be purchased and used as privateers in the Mexican service against the commerce of England and Spain. Although the rumor could not be traced to any direct evidence, it was credited by many merchants, and it was the subiect of considerable discussion. We do not accept it as true.

The plot of war thickens on the ocean, as the English, French and Spanish fleet approaches the shores of Mexico. The Pacific ocean is open to the free roving of Mexican privateers, and there are doubtless plenty of adventurers in the world who will take service for the sake of preying upon the rich commerce of the Indian seas. But if any such projects are on foot in the United States, we have no doubt our gov-ernment will make itself heard in no uncer-

Among the latest marked expressions of true patriotism is the the action of E. A. Stevens, of Hoboken, the commodore of the New York yacht squadron, who has built an iron vessel, of a very peculiar character, fully armed and equipped, which he will present to the United States gov erument, through Mr. Chase, the secretary of the treasury. Mr. Stevens not only builds but arms her, and in fact, turns her over to Mr. Chase ready for active service. without costing the government one dollar.

MEMBER OF ASSEMBLY DEAD .- The gov ernor has issued a proclamation for a spe cial election, on the 7th of January, 1862, to fill a vacancy in the assembly occasioned by the death of S. D. Powers. This is the first notice we had seen of the death of Mr. Powers. He was a republican, and we think was elected from Sparta, in Monroe county. We have known Mr. Powers for many years. He once represented Washington county in the assembly. He has alvays been esteemed a man of integrity as well as ability. His death is a public calamity.

O. A. Brownson lectured at Washington last week on the "National Crisis." said that while he had been no abolitionist. he was in favor of abolishing slavery in a war for the Uniou, and in the event of a reconstruction, to put the question entirely out of the way as a political one.

C QUEEN'S MESSENGER TO LORD LYONS .-The diplomatic corps in Washington will doubtless be put in a state of ferment for a week or ten days when it becomes known that a special messenger from the Queen is passenger by the Europa, and that he is bearer of despatches to Lord Lyons; also that the Penguir from Bermuda brings dis-patches for that functionary from Admiral Milne. There is but little doubt, however, that nothing further, at present, will be done by Lord Lyons than to open up a correspondence with our government relative o the matter in dispute. The news by the Europa does not seem to disturb the government at Washington .- N. Y. Herald,

Unlike the Gazette, the Advocate does not charge the publication of the figures in question to a desire to make this county appear to have done more proportionately than its neighbors.

It is a little strange, however, that several presses in the state persist in treating our publication of the statistics of the first twelve regiments as if we had represented that they showed the entire quota of volunteers furnished to the state. - Madison Journal.

If the Advocate did not charge the Journal with "a desire to make Dane county appear to have done more proportionately than its neighbors," it was not for want of a good reason to do so. The Journal accompanied the original publication of its partial statistics with the remark that-"It will be seen that Milwaukee has raised the greatest number and Dane county comes next. This accords with their rank in population. Some counties make a meagre showing in proportion to what they

should have done." We do not wonder that the Journal winces under the exposure of its unfair comparison and unjust claims for Dane county. If it had any candor it would acknowledge its injustice, and admit the propriety of the complaints of its cotemporaries whose localities it disparaged. Its taking in the 11th, which is designated the Dane regiment, and excluding the 13th, for which Bock county furnishes seven of the ten companies, was particularly unjust to Rock, and made the boastful com-

parison in favor of Dane county offensive. The 10th Wisconsin regiment is now at Elizabethtown, on the Louisville and Nashville railroad, forty three miles from

To Our Debtors.

It will be seen by a notice in another column, that on the first of January next there will be a change in the proprietorship of the Gazette. The NECESSITY of a settlement of ALL our accounts will be apparent to all who will give the subject their attention, and as our own convenience will be materially promoted by a settlement before the dissolution of the partnership, and the interest of no debtor will be injured by doing in season what must come at last, we hope there will be no request or attempt at delay. Mr. Wilcox will devote his time to this matter, and as there are a large number of persons to settle with, let each one be prepared when called on. No one will be turned out of the office if he calls here for that purpose.

We still dwell in tents, and should the summer-like weather of the past few days continue, we should want nothing better. But this we cannot expect, and intimations have been given that we shall soon need more substantial habitations. The health of the regiment is improving.

THE PARTY LAST NIGHT .- The party given to the officers of the 13th regiment last night was one of those social gatherings which are long and pleasantly remembered. The company was just large enough to be full and not crowded, and the arrangements were all well made and well carried out. A profusion of military uniforms always gives life and variety to a ball room, and when, as in this instance. bably delay the departure of the regiment. the freedom of social intercourse is united, a dance has all the agreeable characteristics ever found in such a party. There will be abundant reasons for mutual pleasant recollections when the duties of an active campaign separate the regiment from our citizens.

INSURANCE. FIRE INSURANCE COMPANY, May 1, 1860.

HARTFORD

Total Assets. 3555,754 53
Total Liabilities. 454,847 72
Insurance against loss or damage by fire, on Dwellings, Furniture, Stores, Warehouses, Merchandles, Mills, Manufactories, and most other kinds of property, can be effected in this company upon as favorable terms as the nature of the risks and security of policy-hotlers.

will admit.

The above is the oldest company doing business in this state, and with peculiar propriety has been denominated "The Old Hartford." As an indemnity to the insured, it refers to a solid million of assets well invested; and if anything were needed to commond it to the public for liberal patronage, we might offer its history of success in business and honorable dealing with its patrons, for over half a century, as amply suddent for the purpose.

THE above are First Class, justly popular, and prempt paying companies. They invite investigation into their condition and solicit business entirely upon their real merits. In point of solvency and reliability and honorable dealing, they have but few equals, and no experiors. They are founded upon the very best securities in the world—dirst class bonds and mortgages upon property in New York and Brocklym—securities that have not, for the past ten years depreciated below par, and are every way more reliable and permanent than railroad, bank, and other stocks, which are subject to the fluctuations of the market, and liable, in times of panie, as the experience of the past tenches, to become almost, if not sutirely, valueless. And while there are Companies entering the field of competition, well calculated to mislead by publishing partial and one-sided statements of their condition, and without a cash surplus on hand sufficient to retinaire their outstanding risks, the above named companies always have and keep over and above their capital funct he amount, and in most instances four times, needed for the reinsurance of all their risks. With much a foun-lation, and with such a condition, they claim the right to look with confidence to the public for liberal patronage.

Policies issued without delay, and farms risks for a series of pars taken at less rates than can be lone by Mithal Companies, and a certainty given instead of an associatify. All losses promptly adjusted and paid.

New York Life Insurance Company. Case Capta, over 11,500,000 all well invested for the benefit of Pelley holders, so that the profits of this vast sum pay a large proportion of their annual premiums. This is unquestionably the very best Life Company doing business in this state.
